### What do you mean "out-of-network"?

An **out-of-network provider** is one which has not contracted with your insurance company for reimbursement at a negotiated rate.

Some health plans, like **HMO's and EPO's**, do not reimburse **out-of-network providers** at all (except in emergency situations), which means that as the patient, you would be responsible for the full amount charged by the provider if they are not in your insurers network. Other health plans offer coverage for out-of-network providers, but your **out-of-pocket costs** would be higher than it would be if you were seeing an **in-network provider**.
