

Hysterosalpingogram HSG - Details

Last Modified on 12/13/2024 1:32 pm EST

Exam Details - Hysterosalpingogram HSG

Available at:
DC Only

Used To:

- View uterine cavity and fallopian tubes

Why:

- Usually performed for infertility

How:

- Contrast is injected through the cervix to the fallopian tubes
- The contrast determines whether or not there is a blockage in the fallopian tubes

Scheduling:

- When scheduling, you do not have to reference the radiologist schedule.
- This exam is only performed once daily, at 7:30am
- This exam must be forced onto the schedule in the designated timeslot; be sure to read any blocks on the timeslot BEFORE forcing the exam.

Machine:
